# Reetik Patel

FRONTEND ENGINEER I DESIGN ENGINEER
NN/G UX MASTER CERTIFIED

(479) 385-1212 reetikp@gmail.com linkedin.com/in/reetik github.com/reeeeeee-dev reetikpatel.me Bentonville, Arkansas

## *Professional Summary*

Senior frontend engineer and NN/g UX Master with 10 years of experience. Ships the interface and the BFF layer under it. Designs in Figma and builds the production code. Creates component libraries and design systems, documented in Storybook. Led Design Pickle's full move from Rails-served React to Remix / React Router 7. Built React tools for Divvy's budget groups, which serve 461K+ businesses with over $4B in TPV. Designed and built the React frontend for Walmart's emergency alerting platform. Verified WCAG 2.1 AA on NWA Chess Foundation: zero axe-core violations across 9 routes. Cares about the engineers who use the code as much as its end users. Portfolio: reetikpatel.me.

## *Core Competencies*

Frontend Engineering (React, TypeScript) | Design Engineering, Figma to Production | Design Systems & Component Libraries (Storybook) | Legacy-to-Modern Frontend Migrations | Developer Experience: Monorepos, CI/CD, SDK Docs | Accessibility (WCAG 2.1 AA, axe-core) | BFF Architecture & APIs (Node.js, Hono, tRPC) | UX Research & Interaction Design (NN/g)

## *Work Experience*

### WayPave

Apr 2026 - Aug 2026

FRONTEND DEVELOPMENT CONTRACTOR
Remote

- Redesigned the marketing site for a workforce platform. It connects frontline workers with local jobs. Modernized its visual design on Vite, Handlebars, and Tailwind.
- Shipped the site to Firebase Hosting. Used AI-assisted workflows to speed delivery.
- Audited the site with Lighthouse.

### Design Pickle

Sept 2024 - Apr 2026

SENIOR FRONTEND SOFTWARE ENGINEER
Remote

- Led the full migration from legacy Rails-served React to Remix / React Router 7. Moved high-traffic pages first and rewrote complex components in flight.
- Set up a CI/CD workflow to publish Storybook for both the legacy and new apps. It kept design and engineering in step across teams.
- Released new project management features end to end, along with bug fixes. Used TanStack Query for API data.
- Raised test coverage and code readability across the codebase. The team adopted Vitest for tests.

### Xerosec LLC

Jan 2024 - May 2024

LEAD FRONTEND ENGINEER
Remote

- Designed, built, and released a new React frontend for a script-sharing security platform. Built it on an NX monorepo with a component library documented in Storybook.
- Connected the app to Azure B2C with OAuth2. Built CI/CD pipelines with GitHub Actions.

### Bill.com / Divvy

Oct 2022 - Dec 2023

SOFTWARE ENGINEER II
Remote

- Created new React budget tools, with policy management and import, for budget groups. They serve 461K+ businesses that control over $4B in TPV.
- Built a complex branching wizard. Moved its shared math out of state management. State had two jobs: store data and handle navigation.
- Migrated a legacy JavaScript monorepo to new federated TypeScript repositories.
- Raised test coverage with Jest and Cypress. Made the code easier to read.
- Worked with product on UX decisions.
- Pair programmed with the team. Reviewed two teammates' PRs for each PR submitted.

### Walmart Global Tech

Nov 2016 - Sept 2022

IGNITE EXTERN TO ASSOCIATE SOFTWARE ENGINEER

- Designed and built the full React frontend for an emergency alerting platform. Walmart's EOC commissioned it after El Paso. It sent mass alerts for active shooters, severe weather, and COVID exposures.
- Created an admin UI for an internal notification platform. The platform ran inside 200+ business-facing mobile apps. Added role-based access for dev and business users.
- Applied UX practices to SDK docs and example projects. Covered the React Native, Android, and iOS SDKs. Shared them with thousands of associates.
- Ran the Apple code signing process for all internal iOS apps. It covered hundreds of certificates and 600+ provisioning profiles.
- Automated many support processes with Jenkins CI/CD pipelines.
- Wrote REST API routes in Node.js and Java Spring Boot backends.
- Worked with the AI & Machine Learning team on an API and a React Native app. It improved data entry and replaced manual verification work.
- Managed deployments to hybrid cloud infrastructure, on-prem and in Azure. Took on-call shifts for production support.
- Set up API secrets management workflows and updated SSL certificates.
- Mentored a junior engineer.

## *Projects*

### NGG Dandiya | *nggdandiya.com*

REACT ROUTER 8, REACT 19, CLOUDFLARE WORKERS, D1 / DRIZZLE, HONO, STRIPE CONNECT, BUN, TURBOREPO, PLAYWRIGHT, TAILWIND V4

- Built the ticketing platform for the Northwest Arkansas Gujarati Group's annual Dandiya Night. The event sells 1,300-1,700 tickets a year. A public site, an organizer admin, and an API run as three Cloudflare Workers on one D1 database. The site and admin reach the API through typed service-binding RPC. The API alone writes to D1 or reads buyer PII. Stripe Checkout runs through a Stripe Connect platform, with signature-verified, idempotent webhooks. Ticket emails carry Apple and Google Wallet passes. The organizer admin sits behind Cloudflare Access. It handles coupons, order lookup, and door check-in by webcam or QR scanner. Playwright e2e tests run axe on every admin page. Built solo with AI coding agents: 336 commits from Sep 21 to Oct 8, 2026.

### NWA Chess Foundation

REACT ROUTER 8, CLOUDFLARE WORKERS, D1 / DRIZZLE, THREE.JS, TAILWIND

- Built the full site for a new nonprofit. Event and tournament registration runs on Cloudflare D1. It adds server-side USCF rating autofill and Zod-enforced entry rules. Turnstile and a honeypot block bots. Verified WCAG 2.1 AA: zero axe-core violations across 9 routes. A scripted contrast audit gates 13 color pairs at 4.5:1 / 3:1. The six-layer Three.js parallax hero drops out under prefers-reduced-motion. Cloudflare Access and JWKS-verified JWTs guard the admin.

### Pura Coco | *officialpuracoco.com*

NUXT, VUE, CLOUDFLARE WORKERS

- Designed and built the official artist website and EPK. Created the visual identity, typography, and color system from scratch in Figma. Took the design through to production. Built a component-driven layout with Bandsintown tour and mailing-list integrations. Added full SEO and Open Graph metadata.

### All AV Services | *allavservices.com*

NEXT.JS, STYLED COMPONENTS

- Sole designer and engineer. Designed the layout, typography, and component system in Figma. Built the responsive site in Next.js and Styled Components. Tuned it for performance and accessibility.

## *Education*

### Nielsen Norman Group

UX MASTER CERTIFIED

Interaction Design & UX Research

### University of Arkansas

B.A. COMPUTER SCIENCE, MINOR IN MANAGEMENT

## *Awards & Honors*

IGNITE IT STUDENT OF THE YEAR

2018

## *Skills*

**Languages:** TypeScript, JavaScript, Python, Kotlin, Java, HTML, CSS, SASS

**Frameworks:** React, Remix / React Router 7, React Native, Next.js, Vue, Nuxt, Node.js, Hono, tRPC, Spring Boot, TanStack Query

**Testing:** Jest, Cypress, Vitest, Playwright, axe-core

**Tools:** Git, GitHub Actions, Jenkins, Docker, Grafana, NX, Turborepo, Bun, Vite, Lighthouse, Firebase Hosting, Office 365

**AI Coding Tools:** Claude Code, Cursor, OpenCode, Oh My OpenCode, Gemini

**Design & UI:** Figma, Wireframes, Interactive Prototypes, Adobe XD, Adobe Illustrator, Design Systems, Component Design, Visual Design, Tailwind CSS, Styled Components, Storybook, Sketch, Zeplin

**Specialties:** BFF Architecture, Component Libraries, GraphQL, Web Performance, Accessibility (WCAG 2.1 AA, semantic HTML, ARIA), CI/CD, Azure, Cloudflare

**Ways of Working:** Agile on every team, pair programming, code reviews, small-business client work, stakeholder collaboration

**Leadership:** ACM President at the University of Arkansas (mentored student engineers, planned events, worked with sponsors and guest lecturers), GoIT mentor for middle school mobile development, mentor to engineers outside of work

**Spoken:** English, Gujarati
